

Net

Mission: *Establish reliable, lowest technical common denominator communications, locally & regionally, in a HOA.*

Repeater VHF. 145.250 MHz, -0.6 MHz, PL 141.3
Program Channel. Channel 11 on Baofeng, Icom, etc.
Channel 12 on Yaesu, because they're special!
AllStarLink node. 584801 (KI5UNR-R)

Simplex frequencies.

VHF 146.470 MHz, channel 12
UHF 446.025 MHz, channel 14
6m 50.330 MHz
10m 29.250 MHz

Scheduled nets.

Net Monday, 7:00 PM
Net Thursday, 7:00 PM
Ladies net Thursday, 4:00 PM
After the net Monday, after 7 PM net

After the net is called on the Monday night net. It may be called by anyone who wants to try something. Simply report traffic and request others to join the after the net. Give the frequency and criteria. For example, 'handi-talkie only to repeater' or perhaps 'UHF simplex'.

This is a time of trying antennas, radios, and testing equipment. It is casual with a coordinator, but not a controller. The normal frequencies are shown above. It is prime time to talk and get comfortable. This reveals who you can talk to when there are problems. You will be surprised.

Open. The nets and the repeater are open and available to any licensed ham. Please practice genteel decorum.

Ham radio, when nothing else works.
