

**Ham 108 – State of Evergreen**  
Dr. Marc & Rosemary © 230614

Wow, it is utterly amazing how you and Evergreen Communications Group have developed in the last year-and-a-half.

We now have 41 people with an advanced license. Forty-one. 41!

Generals = 23

Extra = 18

That is absolutely amazing. More have told me they are working to move on up.

Almost no group has that level of achievers.

With that in mind, the Elmers are expanding the participation options.

Goal #1: Be able to communicate.

That imperative suggests having as many ways as possible, to address different circumstances, conditions, and experience.

We are still expanding the UHF system at the speed of sound.

We are improving the VHF repeater antenna to receive better.

We are adding 6-meter and 10-meter activity as fascinating bands transitioning to more HF.

The attached articles begin the discussion. (Ham 102 & Ham 105)

With this many people, variety of systems, and levels of skill, we ask you to become an Elmer.

NO Experience Necessary.

A Tech can be a very effective Elmer.

Let one of us know your areas of interest. We will teach the teacher.

More can be done with more.

Ham radio: You pick the activity you are interested in learning.

NOTE: The absolute optimum HF+6 radio for performance, ease of use, and cost is on sale.

**ICOM 7300** retail is \$1399, still a bargain.

Sale price with rebates is \$899.

DXEngineering, Ham Radio Outlet, or the usual vendors.

If your budget allows, get one, today.

Next Sho 'n Tell on July 1 from 9-11 AM.
